

Hansit Varshney

Gurgaon, India | hansitvarshney@gmail.com | +91 9205256900 | [linkedin.com/in/hansit-varshney-4b8903186](https://www.linkedin.com/in/hansit-varshney-4b8903186) | github.com/hansitvarshney

EDUCATION

Sushant University

B.Tech, Computer Science Engineering (AI & ML); Minor in Artificial Intelligence

Relevant coursework: Deep Learning, NLP, Predictive Modeling, Data Structures & Algorithms

Gurgaon, India | 2022 - May 2026

Queen's University

Computer Science coursework toward BSc (studies discontinued)

Kingston, ON | 2019 - 2021

Scottish High International School

ICSE Class XII: 90% (2019) | Class X: 93% (2017) | Honour Roll (2015-2019)

Gurgaon, India

LEADERSHIP & SERVICE

- Scottish High (2016-2019): Founded Engineering Club; MUNs (30+ schools), hackathons, science quizzes; Intl. Olympiads (Math & Science); Sports Captain. BFW School for the Blind: fundraising + audiobook conversion. QHacks 2020 volunteer.

EXPERIENCE

SKIC Pvt. Ltd.

Part-time Systems Developer & Operations Analyst

Gurgaon, India | Jan 2025 - Present

- Deployed EPCDash in production across multiple EPC construction projects; reduced manual reporting by ~2-3 hours/day and decreased quantity, labour, and billing errors.
- Gathered requirements from project managers and site teams; translated Excel/WhatsApp field workflows into structured, automated reporting pipelines.

upGrad x Uber (MentorMind)

Mentor-Led Data Science Program | Certified by upGrad Education Pvt. Ltd.

Remote | Jun 2024 - Jul 2024

- Built a capstone model to forecast hourly traffic volumes at road junctions using feature engineering and predictive modeling on historical traffic data.

Cipla

Business Intelligence Analyst

India | Jun 2021 - Aug 2021

- Produced SQL-driven KPI dashboards and recurring reports for pharmaceutical stakeholders; validated data quality and documented reporting logic.

PROJECTS

AdaptLoop - Continuous LoRA Adaptation Platform

Python, Redpanda, Bytewax, PostgreSQL/pgvector, Redis, PEFT LoRA, MLflow, MinIO | github.com/hansitvarshney/AdaptLoop

Jul 2026

- Built event-driven ML adaptation loop: LLM signals -> Bytewax aggregation -> curated datasets -> LoRA fine-tune -> lag/eval/LLM-judge-gated promote into multi-tenant gateway.
- Production failure modes: train/serve skew defense, feedback-poisoning quarantine, consumer-lag gates, sticky canary_percent split, Staging SLO auto-rollback.

LLMOps Gateway & Observability Platform

Python, FastAPI, Redis, Qdrant, PostgreSQL, OpenTelemetry, Docker, arq | github.com/hansitvarshney/llmops-gateway

Jul 2026

- Async multi-tenant LLM proxy: OpenAI/Anthropic adapters, dual-layer cache (Redis + Qdrant), circuit breakers, cross-provider failover; 127+ unit tests.
- Adapter-route promotion for AdaptLoop (alias -> base model + LoRA adapter_id, sticky canary); multi-tenant auth, rate limits, Postgres traces.

EPCDash - Enterprise EPC Project Command Center

Python, FastAPI, Next.js, LangGraph, Gemini, SQLite, Railway | github.com/hansitvarshney/EPCDash

Jun 2026

- Full-stack EPC command center bridging engineering schedules and client billing; LangGraph multi-agent multimodal ingestion; live at SKIC Pvt. Ltd.

AEVAR - GraphRAG Financial Audit Pipeline

Python, Neo4j, Pydantic, Google Gemini, Streamlit | github.com/hansitvarshney/AEVAR

Jun 2026

- Pydantic-gated invoice ingestion + Neo4j GraphRAG for flagged transactions; schema-constrained Gemini agent for executive risk briefings.

Academic ML Portfolio

- IMDB Sentiment (GRU), Face CNN (LFW), Credit Card Fraud (Isolation Forest), Fashion MNIST (~88%).

Coursework

TECHNICAL SKILLS

Languages: Python, Java, SQL, TypeScript

ML & AI: PEFT LoRA, HuggingFace, MLflow, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, LangGraph, RAG, GraphRAG, Gemini, OpenAI

Backend & Data: FastAPI, SQLAlchemy, Redis, PostgreSQL/pgvector, Redpanda/Kafka, Bytewax, Neo4j, Qdrant, MinIO, Docker, OpenTelemetry, pytest

Frontend: Next.js, React, Tailwind CSS, Streamlit
